

ERI – VERTICAL MULTISTAGE PUMPS

Construction

Industrial heavy duty multistage centrifugal pumps of inline design with flange or Victaulic couplings with equally sized suction and discharge ports. All metal liquid contact parts are in stainless steel. The pump benefits from cartridge mechanical seals for ease of maintenance. The pumps are fitted with standard frame size motors.

Applications

The ERI pumps are suitable for a numerous applications.

Water supply and pressure boosting: Pressure boosting in buildings, hotels, residential complexes, pressure booster stations, supply of water networks, pressure boosting for industrial water supply.

Light industry: Washing and cleaning systems, car washing facilities, fire fighting equipment, process water systems, machine tools (cooling lubricants).

Heating ventilation and air-conditioning: Boilers, induction heating, heat exchangers, refrigerators, cooling towers and systems, temperature control systems.

Irrigation and agriculture: Greenhouses, sprinkler irrigation, field irrigation (flooding).

Water treatment: Water softeners and de-mineralization, reverse osmosis systems, distillation systems, filtration, ultra-filtration systems.
